It is definitely not normal for young athletes to suffer from cardiac arrests or to die while playing their sport, but this year it is happening. All of these heart attacks and deaths come shortly after they got a COVID shot. While it is possible this can happen to people who did not get a COVID shot, the sheer numbers clearly point to the only obvious cause.

The so-called health professionals running the COVID shot programs around the world keep repeating that “the COVID shot is a normal vaccine and it is safe and effective.”

So in response to their pronouncement, here is a non-exhaustive and continuously growing list of young athletes who had major medical issues in 2021 after receiving one or more COVID shots. Initially, many
of these were not reported. We know that many people were told not to tell anyone about their adverse reactions and the media was not reporting them. They started happening after the first COVID vaccinations. The mainstream media still are not reporting most, but sports news cannot ignore the fact that soccer players and other stars collapse in the middle of a game due to a heart attack. Many of those die – about 50%.

Athlete collapses and deaths chart 5 December 2021.

**List of Injuries**

Here is a non-exhaustive list of injuries reported. Most were cardiac arrest.

- Heart Attack or Cardiac Arrest
- Blood Clots or Thrombosis
- Stroke
- Irregular Heartbeat
- Arrhythmia
- Neuropathy
Growing Report

This story will grow over time, as new information is added. If you have proof of information that we don’t already have, or if you have a correction, please send it through our contact form, with as much information as possible. Useful information would be the person’s name, age, what happened to them, if they had the COVID shot(s), date of death, link to any news story.

For the skeptics who believe this is normal, feel free to repeat the following 18 words, after reading each record or name in this list.

Repeat This After Reading Each Line

“The COVID shot is a normal vaccine. The COVID shot is safe. These injuries and deaths are normal.”

**May Or May Not Be Vax Related**

There is insufficient information to decide if any of these collapses or deaths are related to COVID vaccinations. More investigation is needed. Any help would be appreciated because keeping with with the ongoing investigations isn’t easy. These are listed here because they appear in some lists as vax-caused, but we believe there is either currently insufficient information to decide or other explanations seem to overrule vax-caused, such as cancer.

Summary

That is the current list ... all these athletes have suffered heart problems after COVID shots. At the time of initial writing, 28 died. That was not normal, but then, 10 days later, 56 deaths were listed, and the numbers are climbing. Any other real vaccine would have been pulled off the market long before now. The media would be asking questions. They would be pressuring governments. But they are not. And governments are continuing on and running TV and radio and newspaper ads encouraging people to get their 1st, 2nd, 3rd, 4th shot. Perhaps that is why the mainstream media are saying little, because they are collecting government money for ads?

The deaths and severe reactions will continue until so many people die that it becomes obvious the shot is 10x to 100x worse than the virus it is supposed to treat.

These athletes are the canaries in the mine that warn us of imminent danger. They are being hidden so the people who are not paying attention do not see the warning.

We only see the athletes because they are in the spotlight. The nobodies – i.e. most citizens – do not make the news.

More Information.
